Hi all – I'm adding my minor edits to the mix here. I agree with Vicki that we probably should include the response to major SAB comments (even if there were no major comments). It is a bit redundant, but I'll just add that we will have to add similar language to the Interagency Review email anyways. I've attached a draft of the IAR email to this email.

That's just my two cents though.

Yes that is the section I meant – but thinking it would be relevant for the SAB comments. Gina – should it be included?

Thanks for looking it over Vicki. So, regarding the missing piece are you talking about the section in the ammonia fact sheet entitled "Major Comments Received on RfC during Final Agency Review and Interagency Science Discussion"? I took out this section as it did not seem logical since according to Dahnish's schedule, the BaP document will go through IOAA review *before* going through Final Agency and Interagency Review. I could add comments and responses from the SAB review, but that may be a bit redundant. We briefed Bob in April on the major SAB comments (I believe I submitted

a one pager) and how we were planning to respond, and after laying out the comments, he said something to the effect of it doesn't seem like they had any major comments.

Kathleen, I read it over and made some changes. Gina should also review – she has more experience on what should be included in these. The major thing that seemed to be missing is the response to comments section (compared to the example I had from Ammonia). Gina is this ok or should it be added in.

I changed the date to November – seems more likely.

Thanks

Vicki

Hi all, let me know if you have comments. (The table formatting is a bit wonky if anyone wants to play with it).
